VINYL CUTTER C V SERIES

Secabo C V is the latest generation of Secabo's successful vinyl cutters. These models feature a fresh and unique design. Thanks to the high cutting quality and precision, the plotters are suitable for all advertising technology uses and all common materials. Users benefit from the completely new, convenient menu navigation and intuitive handling. The multilingual cutting software DrawCut LITE for Windows is also included. Another great advantage:

The integrated LAPOS contour cut feature allows for precise cuts, even when working with small objects. Secabo C V cutters are quick and easy to install. Additional drivers are not required. A stable stand with a roll mount ensures reliable stability and safe supplying of foils.

New optimized controller – so you can keep track of everything

The controller of the Secabo cutting plotter has been optimized for smooth use and easy access to all important functions. The adapted design and the improved menu navigation should ensure an even better overview of the daily work routine.

DrawCut LITE cutting software – standard on board!

The multilingual cutting software DrawCut LITE for Windows is included in the scope of delivery. DrawCut LITE not only reliably handles design and layout tasks and imports a wealth of graphic file formats, but also steers the Print&Cut applications of LAPOS 2. DrawCut LITE has many powerful text tools, vector functions, plotting and weeding tools and is therefore the ideal cutting software for quickly achieving professional plotting results with little training.

Sturdy stand with roll holder – because order must be orderly

A sturdy stand is of course also included in the scope of delivery. The roll holder makes working particularly fun: film rolls are unwound smoothly and jerk-free, ensuring high precision even with long plots.

Upgrade to DrawCut PRO available

You can upgrade from the supplied version of the DrawCut LITE cutting software to PRO at any time. DrawCut PRO's advanced design and layout tools will make your work easier and faster, while the vectorisation function will open new doors for you.

ACCESSORIES VINYL CUTTER

Drag knife

For all Secabo vinyl cutters, carbide, cutting angles from 30°, 45° or 60° - depending on the application area, offset 0.25mm.

Plot surfaces

Easily self-adhesing, can even be used with very thin and fragile films. Available in A4, A3 and 60cm x 90cm.

Blade holder

For all current and all older models, ball-bearing aluminum blade holder, blade immersion depth can be set via an adjusting screw, comfortable ejecting by a spring pin.

Catch-up basket

For all current and all older models. Ideal protection of media against dirt, dust, static charges and, at the same time, a practical container for falling film waste.

SignCut

Efficient cutting software for MAC OS and Windows. SignCut supports you during the entire production process. SignCut Pro is always up to date, compatible with all Corel Draw and Adobe Illustrator versions. No LAPOS support.
